Clement Borkowski

Clement Borkowski is Managing Partner at ASI Capital. Mr. Borkowski has primary responsibility for strategic direction for all healthcare and operating entity transactions. He oversees the development, underwriting, due diligence, deal structure and asset acquisition strategies for all co-sponsorship investments. Clement Borkowski routinely does site visits and third party verifications on the companies and managers behind the ASI owned assets. In addition he handles all legal, regulatory compliance, and investor relations for ASI.

ASI Capital

Tangible Investments

ASI Capital offers Accredited* investors portfolio diversification by focusing investments on non-correlated real-economy assets. The Company is currently focused on several real economy sectors that management believes are poised for continued growth and indicate a long term need for private capital:

What Are Alternative Investments?

Numerous companies are positioning their investment style and funds into the alternative space. Referring to a fund as "alternative" or "non-traditional" is popular now because investors are looking for an alternative to volatility and they aren't finding it in traditional markets. Let's face it, institutional investment companies and ETF providers know that these alternatives are popular right now, and most products out there are labeled alternative for marketing and sales purposes.

Portfolio Protection

The portfolio stabilizing benefits of alternative investments are now available to qualified investors. Accredited Investors*, like you, now have access to a variety of private, non-traditional investment funds; funds like those provided by ASI Capital.

ASI Capital offers private funds with fixed returns available to independent financial advisors and their Accredited clients. We offer our investors portfolio diversification by focusing our investments on non-correlated real-economy assets, which are historically less affected by the news of the day in stock and bond markets.
